

Good Friend, Inc., a Waukesha County-based nonprofit, has been teaching children and adults about autism and good friendship since 2007, and has been a proud Girl Scouts Wisconsin Southeast Community Event Provider since 2014.

Did you know that almost 40% of girls are neurodivergent?

Life Skills for Daisies through Cadettes that align with the GSLE!

Neurodiversity is the idea that we all have different brain wiring. If you don't have a diagnosable brain-based difference, such as autism for example, you are of the "neuromajority", or are "neurotypical". But if 2 in 5 of us think and experience the world differently because our brains process information differently, then we should probably explore that!

Our in-person (or remotely delivered) autism awareness-acceptance-empathy programs connect specifically with your girls on these levels:

- **Daisies:** Vi, Tula, and Zinni petals help make good friends.
- **Brownies:** Steps coincide with the Making Friends badge requirements.
- **Juniors:** Concepts align with the Agent of Change journey.
- **Cadettes:** Concepts align with the aMAZE! journey.

We can bring the A/V technology we need to you or tap into your meeting space's existing resources to conduct our program, which includes:

- An interactive, multi-media presentation (30 min. for Daisies, 45 min. for Brownies, 60 min. for Juniors or Cadettes) with a screening of a 20-minute long peer education film ("We ALL Fit" for Daisies, Brownies, and Juniors, or "Choosing to Be a Good Friend" for Cadettes).
- An informative takeaway *plus* an "I am a Good Friend" participation patch for each of your girls.
